(3rd party) * http://www.sensormatic.com		Sensormatic Mobile Handheld Deactivator	►Designed to attach to MT2070 for an all-in-one mobile scanner/deactivation solution. ►After scanning merchandise, the deactivator emits a visual and an audible signal to confirm successful AM label deactivation. When lit, the indicator light alerts cashiers that an active label is still in the deactivator's range. This level of intelligence and control helps prevent sweethearting, scan avoidance and merchandise switching. ►The mobility feature allows cashiers to scan and deactivate heavy, bulky merchandise in the shopping cart to help improve checkout throughput, reduce nuisance EAS alarms at the door, and minimize heavy-lifting related injuries. As a result, the deactivator contributes to a greater flexibility and safety for store associates, as well as faster checkout and increased customer satisfaction. ►Includes cradle adapter for the MT2000 cradle that allows both the MT2000 and Handheld Deactivator to be cradled and charged simultaneously.
