IP-65 Compliant & Internal Power Supply
DS-DELL-700 Series *(PATENT PENDING)*

Weather can be a factor in a range of work environments, and with the IP65 Weatherproof Docking Solution for the Windows based Latitude 12 Rugged Tablet from Dell, Havis brings you the best computing solution for all your business needs. The DS-DELL-700 Series Docking Station will offer tablet charging, security, and connection to peripherals in enterprise, warehouse, and other in-vehicle work environments. Maximize your productivity with this lightweight and strong design that is built with theft deterrence, longevity, stability, and the elements in mind.

IP 65 COMPLIANT

What Does IP65 Mean?
Ingress Protection rating determines the ability to protect enclosures from dust and water. The "65" means your docking solution is able to withstand the highest ingress rating of "Dust Tight", and is able to protect against jets of water from every direction, a force similar to that of heavy seas.
