Industrial Mobile
Computer

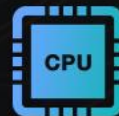

Ultra High Performance

Powered by Android 13 and equipped with an Octa-core CPU, it delivers faster performance, smooth operation, and stable data transmission.

Android 13

Octa-core CPU

Cold Resistance

The Urovo RT40S portable long-range barcode scanner is a rugged industrial computer designed for low-temperature environments. It features a professional anti-condensation screen and cold-resistant properties, suitable for freezing and refrigerated settings. The screen and scanning window automatically heat to room temperature in low temperatures, even down to -30°C .

Super Stable Wi-Fi

Support Wi-Fi 6 protocol and 2X2 MU-MIMO

Network speed and multi-device
