Safe Harbor Statement

Statements during this event may include forward-looking statements within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements speak only as of the date made during this session.

Statements during this event may also include discussion of Extreme Networks' current product roadmap. All product releases will be on a when-and-if available basis. Actual feature development and timing of releases will be at the sole discretion of Extreme Networks. Not all features are supported on all platforms. Presentation of the product roadmap does not create a commitment by Extreme Networks to deliver a specific feature. Contents of this roadmap are subject to change without notice.

There are several important factors that could cause actual events and/or the product roadmap to differ materially
from those suggested or indicated by such forward-looking statements. These include, among others, factors discussed under Item 1A. "Risk Factors," in the company's Annual Report on Form 10-K, quarterly Forms 10-Q, and other reports filed with the SEC. The company undertakes no obligation to update any forward-looking statements, whether as a result of new information, the occurrence of certain events or otherwise. As a result, of these risks and others, actual results and/or the product roadmap could vary significantly from those anticipated and discussed during the event, and the company's financial condition and results of operations could be materially adversely affected.

Managing and Securing the Network is Getting More and More Complex

Too many apps, interfaces, logins

Integration too expensive

Siloed AI, Apps, and Data

AI not living up to its promise because it's siloed

Buying, Contracts, Renewals

AI

Fragmented licensing models: difficult to buy, manage, renew

The Costs of Complexity Are Real

Kreski

"**80%**

of IT decision makers say the **network is more complex** than two years ago"

—ZK Research, theCUBE Research

"**Siloed data** confines access, resulting in restricted visibility into business operations. This limitation obstructs effective strategic planning and decision-making, **impeding the full potential of AI.**"

—Forbes

35%

As stated by Gartner®, "By 2026, 35% of CIOs focused on composability **will break up with their bad vendors** due to their low rating in the License Complexity Index"

ZK Research and theCUBE Research, The Impact of AI on the Network, Zeus Kerravala, Bob Laliberte, July 2024
Forbes, Data Dilemmas: Say Goodbye To Silos And Hello To Unrivaled AI Insights, Muhi S. Majzoub, May 26, 2024
Gartner, Maverick Research: It's Time to Fire Software Vendors With Complex Licensing!, Stephen White, Roger Williams, November 7, 2023
