

HPE ProLiant Compute DL325 Gen12

What's new

- AMD EPYC 9005 processors that support up to 192 cores, up to 6 TB of DDR5 memory at speeds up to 5200 MT/s.
- Ability to use up to 10 SFF or 20 EDSFF E3.S drives as well as an OS boot device and OCP NICs in the front cage.
- Optional front-accessible boot device for quicker access and redesigned intake on front of chassis for optimal airflow and enhanced thermal efficiency.
- Up to two double-width 400W or four single-wide 75W GPUs.
- Three cooling options: air-cooling, closed-loop liquid cooling for high performance processors, and direct liquid cooling for performance and energy efficiency to support sustainability initiatives.
- HPE Integrated Lights-Out 7 (iLO 7) server management software with streamlined manageability through a redesigned GUI, Redfish API, and increased security through patented secure enclave technology.

Overview

Do you need a 1U single-socket rackmount server that increases rack utilization while mitigating virtualization risks in power-constrained environments?

The HPE ProLiant Compute DL325 Gen12 maximizes your rack utilization while mitigating virtualization risks in power-constrained environments. Power your workloads with a server providing greater memory capacity compared to previous generations. 5th Generation AMD EPYC™ Processors with up to 192 cores, increased memory capability (up to 6 TB), and new HPE iLO 7 help provide a high-performance solution with better data center efficiency.

Features

Next-Level Security, Chip to Cloud

From silicon to software, from factory to cloud, and from generation to generation, HPE ProLiant Compute Gen12 is engineered with a fundamental security approach to defend against increasingly complex threats through an uncompromising commitment to constant security advancements.

Silicon root of trust from HPE establishes a zero-trust security framework at the silicon level to ensure firmware integrity. Continuous protection detects compromised servers and prevents them from booting if malicious code is found. Edge servers are safeguarded with default IDevID certificates.

HPE ProLiant Compute servers provide automated recovery from a security event, including restoration of validated firmware, and facilitating recovery of operating system, application and data connections, providing the fastest path to bring a server back online and into normal operations.

5th Generation AMD EPYC™ Processors with Infinity Guard is built-in at the silicon level offering advanced capabilities required to help defend against internal and external threats to keep your data safe.

HPE iLO 7 supports quantum-resistant (PQC) algorithms and signs HPE ProLiant Compute Gen12 firmware with algorithms approved by CNSA 2.0, which enhances resilience against potential future attacks by quantum computers.

Optimized Performance for your Workloads: Accelerated, Open, and Efficient.

The HPE ProLiant Compute DL325 Gen12 server is an excellent choice for hybrid cloud and containerized environments and other workloads that require high core density and increased memory capacity.

Transform your data center and advance your business. The HPE ProLiant Compute DL325 Gen12 server is powered by 5th Generation AMD EPYC 9005 processors that support up to 192 cores and 500W.

Experience advanced data transfer rates and higher network speeds from the PCIe Gen5 serial expansion bus, with up to six PCIe Gen5 and two front or rear OCP NIC or controller add-in cards slots to improve I/O throughput and reduce latency.

Utilize 24 DIMM slots for up to 6 TB DDR5 memory with increased memory bandwidth and performance

Choice of three cooling options — air-cooling, closed loop liquid cooling for high performance processors, and direct liquid cooling for performance and energy efficiency to support sustainability initiatives.

Intuitive Cloud Operating Experience: Simple, Self-service, and Automated

HPE ProLiant Compute DL325 Gen12 servers are engineered for your hybrid world. HPE ProLiant Compute Gen12 servers simplify the way you control your business's compute—from edge to cloud—with a cloud operating experience.

Transform business operations and pivot your team from reactive to proactive with global visibility and insight through a self-service console.

Automate tasks for efficiency in deployment, instant scalability, and seamless, simplified support and lifecycle management, reducing tasks and shortening maintenance windows.

Simplify and secure server management from edge to cloud with HPE Compute Ops Management, an as-a-service compute management experience that delivers greater simplicity, agility, and speed across your distributed compute environment.

Industry-leading Services and Ease of Deployment

The HPE ProLiant Compute DL325 Gen12 server comes with a complete set of HPE Services, delivering confidence, reducing risk, and helping you realize agility and stability.

HPE Services simplifies the stages of the IT journey. Advisory and transformation services professionals understand your challenges and design an effective solution. Professional services enable rapid deployment of solutions and operational services provide ongoing support.

Services provided under operational services include: HPE Flexible Capacity, HPE Datacenter Care, HPE Infrastructure Automation, HPE Campus Care, HPE Proactive Services, and multi-vendor coverage.

HPE IT investment solutions help you transform into a digital business with IT economics that align with your business goals.

Benefit from real-time operational feedback on server performance plus recommendations for fine-tuning BIOS settings to customize for changing business needs.

Technical specifications	HPE ProLiant Compute DL325 Gen12
Processor type	AMD
Processor family	5th Generation AMD EPYC™ Processors
Processor core available	8 to 192 core, depending on processor
Processor cache	64 - 512 MB L3, depending on processor
Processor number	1
Processor speed	5 GHz maximum, depending on processor
Maximum memory	6.0 TB with 256 GB DDR5
Memory slots	24 DDR5 DIMM slots
Memory type	HPE DDR5 Smart Memory
Memory protection features	On-Die ECC (Error Correction Code) designed to correct bit errors within the DRAM
Drive supported	Up to 4 LFF SAS/SATA, 10 SFF SAS/SATA/NVMe, or 20 EDSFF NVMe, depending on model
Optical drive type	Optional DVD-ROM Optional via Universal Media Bay External support only
Security	Dual locking bezel with high-security Medeco locks and tamper-evident enclosure seals TPM 2.0, Silicon Root of Trust, Secure Boot, optional configuration lock, optional data-at-rest hardware encryption, optional Secure Erase, lockable bezel
Infrastructure management	Included - HPE iLO Standard with Intelligent Provisioning (embedded), HPE OneView Standard (requires download) Optional - HPE iLO Advanced, HPE iLO Advanced Premium Security Edition and HPE OneView Advanced
Power supply type	Up to 2 HPE Modular Common Redundant (M-CRPS) Power Supplies, wattage depending on model
Expansion slots	Up to 6 PCIe Gen5 slots (x16 lanes/each) & 2 OCP3.0 slots (x16 lanes/each)
Network controller	Optional - Minimum 1 to be selected. Wide range of speeds, cabling, chipsets and form factors (PCIe stand-up adapter and OCP3.0 in rear/front). See QuickSpecs for network card choices.
Storage controller	Optional - HPE ProLiant Compute Smart Array Gen12 Storage Controller in a variety of protocols -including NVMe, port count, array utilities, and form factors (PCIe stand-up adapter and OCP3.0) Optional - HPE ProLiant Compute Gen12 OS boot Device, in rear or front accessible or internal. See QuickSpecs for storage controllers selection.
System fan features	7 fans included, standard fan, performance fan, or closed-loop liquid cooling fan

Technical specifications		HPE ProLiant Compute DL325 Gen12
Form factor		1U Rack
Warranty		3/3/3: Server Warranty includes three years of parts, three years of labor, and three years of on-site support coverage. Additional HPE support and service coverage, to supplement the product warranty, is available. For more information, visit https://www.hpe.com/support
Accelerators		Up to 2 double-width 400W or 4 single-width 75W GPUs

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Advisory & Professional services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Support services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- **HPE Complete Care Service:** a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- **HPE Tech Care Service:** the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.
- **HPE Multivendor Services:** Single point of accountability for managing on-site hardware and software support for multivendor products. HPE experts help manage your IT across technologies and platforms for HPE and non-HPE technologies, acting as the single point of contact for your IT operational needs.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GreenLake

[HPE GreenLake edge-to-cloud platform](#) is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.

If you are looking for more services, like **IT financing solutions**, please [explore them here](#).
