## Introduction

### Extend intent-based networking everywhere

Cisco® Catalyst® 9200 Series switches extend the power of intent-based networking and Catalyst 9000 hardware and software innovation to a broader set of deployments. With its family pedigree, **Catalyst 9200 Series switches offer simplicity without compromise – it is secure, always on, and IT simplified.**

As foundational building blocks for the Cisco Networking Cloud, Catalyst 9200 Series switches help customers simplify complexity, optimize IT, and reduce operational costs by leveraging intelligence, automation and human expertise that no other vendor can deliver regardless of where you are in the intent-based networking journey.

Catalyst 9200 Series switches provide security features that protect the integrity of the hardware as well as the software and all data that flows through the switch. It provides resiliency that keeps your business up and running seamlessly. Combine that with open APIs of Cisco IOS XE® and programmability of the UADP ASIC technology, Catalyst 9200 Series switches give you what you need now with investment protection on future innovations.

With full PoE+ capability, power and fan redundancy, stacking bandwidth up to 160 Gbps, modular uplinks, Layer 3 feature support, and cold patching, Catalyst 9200 Series switches are the industry's unparalleled solution with differentiated resiliency and progressive architecture for cost-effective branch-office access. Catalyst 9200 Series switches also provide operational choice of CLI, Cisco Catalyst Center (formerly Cisco DNA Center) on-premises management, or cloud monitoring for Catalyst on Meraki dashboard.

## Product overview

### Product highlights

- Full Power over Ethernet Plus (PoE+) capability for up to 48 ports for C9200. Power over Ethernet Plus (PoE+) capability for up to 12 ports, IEEE 802.3bt class 6 and Cisco UPOE capability for up to 8 ports for C9200CX.
- Resiliency with **Field-Replaceable Units** (FRU) and redundant power supply, fans, and modular uplinks for C9200 models. C9200CX models are fanless and are powered by internal fixed power supply or optional power adapters, when not powered by upstream IEEE 802.3bt class 6 60W PSE.
- Flexible power source options from line voltage AC, low voltage DC to High Voltage DC (HVDC) in C9200CX models provide the choices for customers to migrate to efficient DC micro grid powered by renewable energy sources for a sustainable future.
- Flexible downlink options with data, PoE+, UPOE, UPOE with mGig for Wi-Fi 6/6E.
- Operational efficiency with optional **backplane stacking**, supporting stacking bandwidth up to 160 Gbps.
- **UADP 2.0** Mini with integrated CPU offers customers optimized scale with better cost structure.
- Enhanced security with AES-128 MACsec encryption on C9200 and AES-256 MACsec encryption for C9200CX models, policy-based segmentation, and trustworthy solutions for the whole Catalyst 9200 Series.
- **Layer 3** capabilities, including OSPF, EIGRP, ISIS, RIP, and routed access. C9200CX also supports basic BGP from IOS-XE 17.13.1 for more versatile deployments.

- Cisco **Software-Defined Access** (SD-Access).
  - Simplified operations and deployment with policy-based automation from edge to cloud managed with **Cisco Identity Services Engine** (ISE).
  - Network assurance and improved resolution time through Cisco Catalyst Center.
- **Plug and Play** (PnP) enabled: A simple, secure, unified, and integrated offering to ease new branch or campus device rollouts or updates to an existing network.
- **Cisco IOS XE**: A Common Licensing based operating system for the enterprise Cisco Catalyst 9000 product family with support for model-driven programmability and streaming telemetry.
- Cloud management: Migrate Catalyst 9200 switches to the Meraki dashboard to unlock centralized management and monitoring of devices while retaining advanced features like CLI. [Learn more.](#)
- ASIC with programmable pipeline and micro-engine capabilities, along with template-based, configurable allocation of Layer 2 and Layer 3 forwarding, Access Control Lists (ACLs), and Quality of Service (QoS) entries.
- **Precision Time Protocol** (PTP; IEEE 1588v2) supported on C9200CX models provides accurate clock synchronization with sub-microsecond accuracy making it suitable for distribution and synchronization of time and frequency over network.
- ENERGY STAR® certified models (C9200L models).

## Features and benefits platform details

### Switch models and configurations

**Table 1.** Catalyst 9200 Series models and configurations

| Models                                                | FRU Power Supply            | FRU Fans | Modular Uplinks | Stacking Bandwidth Support | SD-Access Support <sup>1</sup>         |
|-------------------------------------------------------|-----------------------------|----------|-----------------|----------------------------|----------------------------------------|
| <b>Modular uplink models (C9200 Enhanced VN SKUs)</b> | Yes                         | Yes      | Yes             | 160 Gbps                   | Yes (32 Virtual Networks) <sup>2</sup> |
| <b>Modular uplink models (C9200 SKUs)</b>             | Yes                         | Yes      | Yes             | 160 Gbps                   | Yes (4 Virtual Networks)               |
| <b>Fixed uplink Models (C9200L SKUs)</b>              | Yes                         | No       | No              | 80 Gbps                    | Limited (1 Virtual Network)            |
| <b>Compact Models (C9200CX SKUs)</b>                  | Fixed internal power supply | Fanless  | No              | No                         | Yes (16 Virtual Networks)              |

<sup>1</sup> Catalyst 9200 standalone and stack can support 25 Access Tunnels for fabric enabled APs.

Catalyst 9200CX can support 25 Access Tunnels for fabric enabled APs with IOS-XE 17.9.5 and above.

Catalyst 9200L is not supported as Fabric Edge for SD-Access Wireless.

Catalyst 9200, 9200L and 9200CX do not support SD-Access Embedded Wireless Controller.

**Note:** Over the top fabric deployments eventually migrating to fabric wireless architecture should consider this limit during design/deployment.

<sup>2</sup> C9200-24PB-A, C9200-48PB-A SKUs supports 32 Virtual Networks. These SKUs cannot be stacked with C9200 SKUs with 4VNs.

The Cisco Catalyst 9200 Series is made up of modular (C9200), fixed (C9200L) and compact (C9200CX) switch models.

## Network modules

Cisco Catalyst 9200 Series switches come with modular or fixed uplinks as indicated in Table 1. With modular SKUs, the field-replaceable network modules provide infrastructure investment protection by allowing a nondisruptive migration from 1G to 10G and beyond. When you purchase the switch, you can choose from the network modules described in Table 3.

**Figure 2.**  
Cisco Catalyst 9200 Series Switch network modules

**Table 3.** Network module part numbers and descriptions

| Network module                 | Description            |
|--------------------------------|------------------------|
| <b>C9200-NM-2Y<sup>1</sup></b> | 2 x 25G network module |
| <b>C9200-NM-2Q<sup>1</sup></b> | 2 x 40G network module |
| <b>C9200-NM-4G<sup>2</sup></b> | 4x 1G network module   |

| Network module        | Description              |
|-----------------------|--------------------------|
| <b>C9200-NM-4X</b>    | 4x 1G/10G network module |
| <b>C9200-NM-BLANK</b> | No network module        |

<sup>1</sup> Supported only on C9200-24PXG, C9200-48PXG

<sup>2</sup> Not supported on C9200-24PXG, C9200-48PXG

## Platform resiliency

### Power supplies

Cisco Catalyst 9200 Series switches support dual field-replaceable power supplies (Figure 3). Each switch ships with one default power supply, and a second identical power supply can be purchased with the initial order or can be added later. The second power supply can provide redundancy or additional power to PoE+ ports as needed.

Cisco Catalyst 9200CX Series HVDC models can be powered by high voltage DC as well as line voltage AC with its default power supply. These switches support high efficiency and low energy consumption when connected to DC micro grid by avoiding multiple AC-DC conversions. The compatibility with AC also provides flexibility and investment protection for moving to DC power in the future.

### Intelligent PoE+

- **IEEE 802.3at PoE+ (up to 30W per port)** is supported on Cisco Catalyst 9200 Series switches to lower the total cost of ownership for deployments that incorporate Cisco IP phones, Cisco Aironet wireless access points, or other standards-compliant PoE+ end devices. PoE+ removes the need to supply wall power to PoE-enabled devices and eliminates the cost of adding electrical cabling and circuits that would otherwise be necessary in IP phone and WLAN deployments. With Cisco Catalyst 9200 Series switches, PoE+ power allocation is dynamic, and power mapping scales up to a maximum of 1440W of PoE+ power.
- **IEEE 802.3bt Class 6 and Cisco UPOE (up to 60W per port)** is supported on Catalyst 9200CX Series mGig model. This facilitates delivery of network power to devices requiring higher power.
- **PoE Powered Device (PD)** - Catalyst 9200CX-12T-2X2G can be powered through the uplink with IEEE 802.3bt class 6 or UPOE power from upstream switch. Catalyst 9200CX-12PT-2G can be powered through redundant uplinks with IEEE 802.3bt class 8 or UPOE+ power from upstream switch.
- **Perpetual PoE** is supported on Cisco Catalyst 9200 Series switches, and maintains the PoE+ power during a switch reload. This is important for critical endpoints such as medical devices and for Internet of Things (IoT) endpoints such as PoE-powered lights, so that there is no disruption during a switch reboot.
- **Fast PoE:** When power is restored to a switch, Fast PoE starts delivering power to endpoints without waiting for the operating system to fully load, thereby speeding up the time for the endpoint to start up.

**Figure 3.**  
Cisco Catalyst 9200 Series Switch dual redundant power supplies

Table 4 lists the PoE power availability for each model.

**Table 4.** PoE+ Power with primary and secondary power supplies

| Model              | Primary power supply        | Available PoE power with single primary power supply only <sup>1</sup> | Optional secondary power supply | Available PoE power with additional secondary power supply <sup>1</sup> |

<sup>1</sup> Limited by port number and port rating (for example, 24 PoE+ 30W ports = 720W)

<sup>2</sup> PWR-C5-715WDC= and PWR-C6-715WDC= are available to order as spare only and supported in IOS-XE 17.8.1 and above

PWR-C5-715WDC= and PWR-C6-715WDC= are only supported on C9200L and C9200 PoE models.

PWR-C5-715WDC= and PWR-C6-715WDC= can mix with AC power supplies as primary/secondary on the same device for C9200L and C9200.

<sup>3</sup> ENERGY STAR® certified model

## Stacking

Cisco Catalyst 9200 Series switch models are designed for stacking switches as a single virtual switch, enabling customers to have a single management plane and control plane for up to 384 access ports.

Table 5 lists the supported stacking options.

**Table 5.** Supported stacking options

| Model                              | Stacking support | Stacking bandwidth support | Stacking hardware | Number of members | Supported stack members                     |
|------------------------------------|------------------|----------------------------|-------------------|-------------------|---------------------------------------------|
| <b>Modular models (C9200 SKUs)</b> | StackWise-160    | 160 Gbps                   | C9200-STACK-KIT   | 8                 | Other C9200 models with same license level  |
| <b>Fixed models (C9200L SKUs)</b>  | StackWise-80     | 80 Gbps                    | C9200L-STACK-KIT  | 8                 | Other C9200L models with same license level |

Mixed stacking is **not supported**. You cannot stack fixed (C9200L SKUs) with modular (C9200 SKUs) models, or other Catalyst switches, e.g. Cisco Catalyst 2960-X and 2960-XR Series. Stacking not available on C9200CX switches.

The optional StackWise-160 and StackWise-80 kits consist of two adapters and a stacking cable. The default stacking cable is 0.5 m, but options of 1 m and 3 m are also available.

Table 6 lists the stacking accessories.

**Table 6.** Stacking accessories

| Model                   | Description                                                                      |
|-------------------------|----------------------------------------------------------------------------------|
| <b>C9200-STACK-KIT</b>  | Stack kit for C9200 SKUs only: Two data stack adapters and one data stack cable  |
| <b>C9200L-STACK-KIT</b> | Stack kit for C9200L SKUs only: Two data stack adapters and one data stack cable |
| <b>STACK-T4-50CM</b>    | Data stack 50 cm cable (default cable with Stack Kit)                            |
| <b>STACK-T4-1M</b>      | Data stack 1 m cable                                                             |
| <b>STACK T4-3M</b>      | Data stack 3 m cable                                                             |

**Figure 4.**  
Cisco Catalyst 9200 Series Switch stacked units

## Fan

Cisco Catalyst 9200 Series switches also come with dual fans and support redundancy. Cisco Catalyst 9200 Series switches support redundancy with dual fans. On the C9200 SKUs, the fan units are field-replaceable, whereas on the fixed C9200L SKUs, the fan units are fixed. C9200CX SKUs are fanless.

Table 7 lists the fan module part number.

**Table 7.** Fan modules

| Model          | Description |
|----------------|-------------|
| <b>FAN-T2=</b> | Fan module  |

## Performance and scalability

Table 8 lists performance and scalability metrics for Cisco Catalyst 9200 Series switches. Table 9 lists the bandwidth specifications.

## Software

### Platform software benefits

#### Cisco IOS XE

Cisco IOS XE Software opens a completely new paradigm in network configuration, operation, and monitoring through network automation. Cisco's automation solution is open, standards-based, and extensible across the entire lifecycle of a network device. The various automation mechanisms are outlined below.

- **Automated device provisioning** is the ability to automate the process of upgrading software images and installing configuration files on Cisco Catalyst switches when they are being deployed in the network for the first time. Cisco provides turnkey solutions such as Plug and Play and Preboot Execution Environment (PXE) that enable an effortless and automated deployment.
- **API-driven configuration** is available with modern network switches such as Cisco Catalyst 9200 Series switches. It supports a wide range of automation features and provides robust open APIs over NETCONF and RESTCONF using YANG data models for external tools, both off the shelf and custom built, to automatically provision network resources.
- **Granular visibility** enables model-driven telemetry to stream data from a switch to a destination. The data to be streamed is identified through subscription to a data set in a YANG model. The subscribed data set is streamed to the destination at specified intervals. Additionally, Cisco IOS XE enables the push model. It provides near-real-time monitoring of the network, leading to quick detection and rectification of failures. Cloud monitoring for Catalyst is also available.
- **Seamless software upgrades and patching** supports OS resilience. On Cisco Catalyst 9200 Series switches Cisco IOS XE supports cold patching with reboot, which provides fixes for critical bugs and security vulnerabilities between regular maintenance releases. This support lets you add patches without having to wait for the next maintenance release. Cold patching requires the switch to be rebooted after patching to allow the changes to take effect.
- **Trustworthy solutions built with Cisco Trust Anchor Technologies** provide a highly secure foundation for Cisco products. With Cisco Catalyst 9200 Series switches, these technologies enable hardware and software authenticity assurance for supply chain trust and strong mitigation against man-in-the-middle attacks that compromise software and firmware. Trust Anchor capabilities include image signing, Secure Boot, and Cisco Trust Anchor module.
- **High availability:** Cisco Catalyst 9200 Series switches support high-availability features, including the following:
  - Cross-stack EtherChannel provides the ability to configure Cisco EtherChannel technology across different members of the stack for high resiliency.
  - IEEE 802.1s Multiple Spanning Tree Protocol (MSTP) provides rapid spanning tree convergence independent of spanning tree timers and also offers the benefit of Layer 2 load balancing and distributed processing.
  - Per-VLAN Rapid Spanning Tree (PVRST+) allows rapid spanning tree (IEEE 802.1w) reconvergence on a per-VLAN spanning tree basis, providing simpler configuration than MSTP. In both MSTP and PVRST+ modes, stacked units behave as a single spanning tree node.

- Switch-port auto-recovery (“err-disable” recovery) automatically attempts to reactivate a link that is disabled because of a network error.
- The Catalyst 9200 Series platform delivers the best SSO resiliency architecture in a stackable solution with sub-50-ms failover.

## The Foundation of Software-Defined Access

### Secure Segmentation with SD-Access

#### Software-Defined Access

The enterprise network lies at the heart of digital transformation. A network that is open, programmable, integrated, and secure maximizes business agility, allowing new business opportunities to be pursued and captured.

Cisco DNA with SD-Access is the network fabric that powers business. It is an open and extensible software-driven architecture that accelerates and simplifies your enterprise network operations. The programmable architecture frees your IT staff from time-consuming, repetitive network configuration tasks so they can focus instead on innovation that positively transforms your business. SD-Access enables policy-based automation from edge to cloud with foundational capabilities. These include:

- Simplified device deployment
- Unified management of wired and wireless networks
- Network virtualization and segmentation
- Group-based policies
- Context-based analytics
- **SD-Access:** Cisco Catalyst 9200 Series switches are the entry-level devices for SD-Access, Cisco’s lead enterprise architecture, with policy-based automation from edge to cloud.
  - Simplified segmentation and micro-segmentation, with predictable performance and scalability
  - Automation through Cisco Catalyst Center
  - Policy handled through the Cisco Identity Services Engine (ISE)
  - Faster launch of new business services and significantly improved issue resolution time

#### Assurance

- Full network visibility and monitoring
- End-to-end Quality of Experience (QoE)
- Fast issue resolution and network remediation
- Plug and Play (PnP) enabled: A simple, secure, unified, and integrated offering to ease new branch or campus device rollouts or updates to an existing network

## Cloud Security

### Umbrella Integration

- **Umbrella Integration:** Small to midsize networks reliant on managed service providers can now host Cisco Umbrella agent directly on their Catalyst 9200 series switches. This allows the business to easily customize their DNS filtering policies to prevent BYOD or IoT guest or corporate users from accessing malicious or inappropriate websites, without having to rely on the MSP to push the policies out. It also lets them optimize use of bandwidth by allowing direct cloud access for trusted apps. Requires Cisco DNA-Advantage License and Umbrella License per device.

### Full Flexible NetFlow

- **Full Flexible NetFlow (FNF):** Cisco IOS FNF is the next generation in flow visibility technology. It enables optimization of the network infrastructure, reduces operation costs, and improves capacity planning and security incident detection with increased flexibility and scalability. Catalyst 9200 Series switches are capable of up to 16,000 flow entries on 48-port, 24, 12 and 8 port models.

### QoS

- **Superior QoS:** Cisco Catalyst 9200 Series switches offer Gigabit Ethernet speeds with intelligent services that keep traffic flowing smoothly, even at 10 times the normal network speed. Industry-leading mechanisms for cross-stack marking, classification, and scheduling deliver superior performance for data, voice, and video traffic at wire speed. Superior QoS includes granular wireless bandwidth management and fair sharing, 802.1p Class of Service (CoS) and Differentiated Services Code Point (DSCP) field classification, Shaped Round Robin (SRR) scheduling, Committed Information Rate (CIR), and eight egress queues per port.

## Smart operation

### Simplified Campus Automation

Simplified Campus Automation is designed to optimize the discovery and configuration of devices in your network with a more streamlined simple and easy-to-use automation tool. With features such as simplified discovery, IT can discover devices within the network within just a few steps. Also available is a more streamlined GUI that provides a better simplified view of switch configurations and software details on a port-by-port basis.

### Cloud management with IOS XE

Cloud management with IOS XE simplifies network operations by providing a centralized, intuitive dashboard that enables IT teams to manage, configure, and monitor all devices in real time. With features like zero-touch provisioning, automated firmware updates, and port-level visibility, cloud management reduces manual effort, minimizes errors, and delivers end-to-end visibility across the network.

The Cisco Catalyst 9200 Series Switches provide operational flexibility in cloud management by offering the ability to choose the configuration source for each device managed from the Meraki dashboard.

**Configuration Source: Cloud:** This operating mode offers full cloud management experience. Device configurations are managed via the Meraki user interface and delivered entirely from the cloud. This capability also offers a read-only Cloud CLI terminal to view the entire running configuration or perform advanced troubleshooting using IOS XE show commands.

**Configuration Source: Device:** This capability is an evolution of Cloud Monitoring. With device configuration, users can onboard their device to the cloud to access central monitoring and troubleshooting tools, as well as a Cloud CLI terminal to execute read/write commands. Configurations are managed via local console, SSH, or CLI and remain local to the device.

To learn more about cloud management with IOS XE, [click here](#).

### **WebUI**

WebUI is an embedded GUI-based device-management tool that provides the ability to provision the device, to simplify device deployment and manageability, and to enhance the user experience. It comes with the default image, so there is no need to enable anything or install any license on the device. You can use WebUI to build configurations, and to monitor and troubleshoot the device without having CLI expertise.

### **RFID tags**

Cisco Catalyst 9200 Series switches have an embedded RFID tag that facilitates easy asset and inventory management using commercial RFID readers.

### **Blue beacon**

Cisco Catalyst 9200 Series switches support blue beacon LEDs for easy identification of the switch being accessed. C9200L and C9200 models support both front and back blue beacon LEDs. C9200CX models support front blue beacon LED.

### **Efficient switch operation**

Cisco Catalyst 9200 Series switches provide optimum power saving with Energy Efficient Ethernet (EEE) on the RJ-45 ports and low-power operations for industry best-in-class power management and power consumption capabilities. The ports support reduced power modes so that ports not in use can move into a lower power utilization state. Other efficient switch operation features are as follows:

- Per-port power consumption command allows customers to specify a maximum power setting on an individual port.
- Per-port PoE power sensing measures actual power being drawn, enabling more intelligent control of powered devices. The PoE MIB provides proactive visibility into power usage and allows you to set different power-level thresholds.

### **Bluetooth**

Cisco Catalyst 9200 Series switches have support to connect a Bluetooth dongle to your switch, enabling you to use this wireless interface as an IP management port interface. The port can be used for configuration and troubleshooting using WebUI or the Command-Line Interface (CLI), and to transfer images and configurations.

### **Storage**

Cisco Catalyst 9200CX switches have support for up to 4G Micro-SD card storage.

## High-performance IP routing

The Cisco Express Forwarding hardware routing architecture delivers extremely high-performance IP routing in Cisco Catalyst 9200 Series switches, based on:

- IP unicast routing protocols (including static, Routing Information Protocol Version 1 [RIPv1], RIPv2, RIPv6, and Open Shortest Path First [OSPF], Routed Access) are supported for small network routing applications with the Network Essentials stack. Equal-cost routing facilitates Layer 3 load balancing and redundancy across the stack.
- Advanced IP unicast routing protocols (including Full [OSPF], Enhanced Interior Gateway Routing Protocol [EIGRP], and Intermediate System-to-Intermediate System Version 4 [IS-ISv4]) are supported for load balancing and for constructing scalable LANs. IPv6 routing (using OSPFv3 and EIGRPv6) is supported in hardware for maximum performance.
- Protocol-Independent Multicast (PIM) for IP multicast routing is supported, including PIM sparse mode (PIM SM), and Source-Specific Multicast (SSM).
- IPv6 addressing is supported on interfaces with appropriate show commands for monitoring and troubleshooting.

## Licensing

### Introduction to Smart Licensing

Cisco Smart Licensing is a flexible licensing model that provides you with an easier, faster, and more consistent way to purchase and manage software across the Cisco portfolio and across your organization. And it's secure – you control what users can access. With Smart Licensing you get:

- **Easy Activation:** Smart Licensing establishes a pool of software licenses that can be used across the entire organization—no more PAKs (Product Activation Keys).
- **Unified Management:** My Cisco Entitlements (MCE) provides a complete view into all of your Cisco products and services in an easy-to-use portal, so you always know what you have and what you are using.
- **License Flexibility:** Your software is not node-locked to your hardware, so you can easily use, and transfer licenses as needed.

To use Smart Licensing, you must first set up a Smart Account on Cisco Software Central ([software.cisco.com](https://software.cisco.com)).

For a more detailed overview on Cisco Licensing, go to [cisco.com/go/licensingguide](https://cisco.com/go/licensingguide)

## Software licenses

| <b>Cloud monitoring for Catalyst</b>                                                                                                                                                                                      | Yes*                      | Yes                      | Yes*                 | Yes                 |

\* Limited device visibility

For a full list of features, please refer to [Cisco Feature Navigatorcfnng.cisco.com](https://cisco.com/go/cfnng)

Cisco Catalyst 9200 Series switches run on Cisco IOS XE Release 16.9.2 or later. This software release includes all the features listed earlier in the Platform Software Benefits section.

## Managing licenses with Smart Accounts

Creating Smart Accounts by using the Cisco Smart Software Manager (Cisco SSM) enables you to order devices and licensing packages and also manage your software licenses from a centralized website. You can set up Cisco SSM to receive daily email alerts and to be notified of expiring add-on licenses that you want to renew.

You must order an add-on license in order to purchase a switch. When the license term expires, you can either renew the add-on license to continue using it or deactivate the add-on license and then reload the switch to continue operating with the base license capabilities.

Both the base and add-on licenses are also available for a 90-day evaluation period. An evaluation license is activated temporarily, without purchase. An expired evaluation license cannot be reactivated after reload.

**Note:** It is not required to deploy Cisco Catalyst Center, just to use one of the above packages.

Table 11 shows the features included in the Network Essentials and Advantage packages.

Table 12 shows the features included in the Cisco DNA Essentials and Advantage packages.

## Specifications

### Dimensions, weight, acoustic, mean time between failures

Table 13-16 show the dimensions, weights, acoustic, and mean time between failures of all models of Cisco Catalyst 9200 Series switches.

**Table 13.** Model Dimensions

| Platform Physical Specifications |                    |                   |                                        |                   |

\* Use shielded cables for locations other than telecom centers

## Power consumption of Standalone 9200 Series switches

Table 20 shows the power consumption of standalone Cisco Catalyst 9200 Series switches based on Alliance for Telecommunications Industry Solutions (ATIS) testing using Internet Mix (IMIX) distribution stream traffic, with input voltage of 115VAC at 60 Hz and no PoE loading. The values given are the maximum possible power consumption numbers under the respective test scenarios.

**Table 20.** Power consumption of standalone Catalyst 9200 Series switches

\* Use shielded cables for locations other than telecom centers

## Ordering

### Ordering information

Table 22 lists ordering information for Cisco Catalyst 9200 Series switches. To place an order, visit the Cisco Ordering home page at:

[https://www.cisco.com/en/US/ordering/or13/or8/order\\_customer\\_help\\_how\\_to\\_order\\_listing.html](https://www.cisco.com/en/US/ordering/or13/or8/order_customer_help_how_to_order_listing.html).

### Switch Models

#### C9200 models

**Table 22.** C9200 Models Ordering information

| Product number       | Product description                                           |
|----------------------|---------------------------------------------------------------|
| <b>C9200-24T-A</b>   | Catalyst 9200 24-port Data Switch, Network Advantage          |
| <b>C9200-24T-E</b>   | Catalyst 9200 24-port Data Switch, Network Essentials         |
| <b>C9200-24P-A</b>   | Catalyst 9200 24-port PoE+ Switch, Network Advantage          |
| <b>C9200-24P-E</b>   | Catalyst 9200 24-port PoE+ Switch, Network Essentials         |
| <b>C9200-24PB-A</b>  | Catalyst 9200 24-port PoE+, enhanced VRF, Network Advantage   |
| <b>C9200-24PXG-E</b> | Catalyst 9200 24-port 8xmGig, 16x1G, PoE+, Network Essentials |
| <b>C9200-24PXG-A</b> | Catalyst 9200 24-port 8xmGig, 16x1G, PoE+, Network Advantage  |
| <b>C9200-48T-A</b>   | Catalyst 9200 48-port Data Switch, Network Advantage          |
| <b>C9200-48T-E</b>   | Catalyst 9200 48-port Data Switch, Network Essentials         |
| <b>C9200-48P-A</b>   | Catalyst 9200 48-port PoE+ Switch, Network Advantage          |
| <b>C9200-48P-E</b>   | Catalyst 9200 48-port PoE+ Switch, Network Essentials         |
| <b>C9200-48PL-A</b>  | Catalyst 9200 48-Port partial PoE+ Switch, Network Advantage  |
| <b>C9200-48PL-E</b>  | Catalyst 9200 48-Port partial PoE+ Switch, Network Essentials |
| <b>C9200-48PB-A</b>  | Catalyst 9200 48-port PoE+, enhanced VRF, Network Advantage   |
| <b>C9200-48PXG-E</b> | Catalyst 9200 48-port 8xmGig, 40x1G, PoE+, Network Essentials |
| <b>C9200-48PXG-A</b> | Catalyst 9200 48-port 8xmGig, 40x1G, PoE+, Network Advantage  |

## Network modules

**Table 23.** C9200 Models Ordering information – network modules

| Modular uplink network modules for C9200 Models |                                               |
|-------------------------------------------------|-----------------------------------------------|
| Product number                                  | Product description                           |
| <b>C9200-NM-2Y (=)</b>                          | Catalyst 9200 2 x 25 GE Network Module, spare |
| <b>C9200-NM-2Q (=)</b>                          | Catalyst 9200 2 x 40GE Network Module, spare  |
| <b>C9200-NM-4G (=)</b>                          | Catalyst 9200 4 x 1GE Network Module, spare   |
| <b>C9200-NM-4X (=)</b>                          | Catalyst 9200 4 x 10GE Network Module, spare  |
| <b>C9200-NM-BLANK (=)</b>                       | Catalyst 9200 BLANK Network Module, spare     |

## C9200L models

**Table 24.** C9200L Models Ordering information

| Product number          | Product description                                                        |
|-------------------------|----------------------------------------------------------------------------|
| <b>C9200L-24T-4G-A</b>  | Catalyst 9200L 24-port Data 4x1G uplink Switch, Network Advantage          |
| <b>C9200L-24T-4G-E</b>  | Catalyst 9200L 24-port Data 4x1G uplink Switch, Network Essentials         |
| <b>C9200L-24P-4G-A</b>  | Catalyst 9200L 24-port PoE+ 4x1G uplink Switch, Network Advantage          |
| <b>C9200L-24P-4G-E</b>  | Catalyst 9200L 24-port PoE+ 4x1G uplink Switch, Network Essentials         |
| <b>C9200L-48T-4G-A</b>  | Catalyst 9200L 48-port Data 4x1G uplink Switch, Network Advantage          |
| <b>C9200L-48T-4G-E</b>  | Catalyst 9200L 48-port Data 4x1G uplink Switch, Network Essentials         |
| <b>C9200L-48P-4G-A</b>  | Catalyst 9200L 48-port PoE+ 4x1G uplink Switch, Network Advantage          |
| <b>C9200L-48P-4G-E</b>  | Catalyst 9200L 48-port PoE+ 4x1G uplink Switch, Network Essentials         |
| <b>C9200L-48PL-4G-A</b> | Catalyst 9200L 48-port partial PoE+ 4x1G uplink Switch, Network Advantage  |
| <b>C9200L-48PL-4G-E</b> | Catalyst 9200L 48-port partial PoE+ 4x1G uplink Switch, Network Essentials |
| <b>C9200L-24T-4X-A</b>  | Catalyst 9200L 24-port Data 4x10G uplink Switch, Network Advantage         |
| <b>C9200L-24T-4X-E</b>  | Catalyst 9200L 24-port Data 4x10G uplink Switch, Network Essentials        |
| <b>C9200L-24P-4X-A</b>  | Catalyst 9200L 24-port PoE+ 4x10G uplink Switch, Network Advantage         |
| <b>C9200L-24P-4X-E</b>  | Catalyst 9200L 24-port PoE+ 4x10G uplink Switch, Network Essentials        |
| <b>C9200L-48T-4X-A</b>  | Catalyst 9200L 48-port Data 4x10G uplink Switch, Network Advantage         |
| <b>C9200L-48T-4X-E</b>  | Catalyst 9200L 48-port Data 4x10G uplink Switch, Network Essentials        |

| Product number           | Product description                                                         |
|--------------------------|-----------------------------------------------------------------------------|
| <b>C9200L-48P-4X-A</b>   | Catalyst 9200L 48-port PoE+ 4x10G uplink Switch, Network Advantage          |
| <b>C9200L-48P-4X-E</b>   | Catalyst 9200L 48-port PoE+ 4x10G uplink Switch, Network Essentials         |
| <b>C9200L-48PL-4X-A</b>  | Catalyst 9200L 48-port partial PoE+ 4x10G uplink Switch, Network Advantage  |
| <b>C9200L-48PL-4X-E</b>  | Catalyst 9200L 48-port partial PoE+ 4x10G uplink Switch, Network Essentials |
| <b>C9200L-24PXG-4X-E</b> | Catalyst 9200L 24-port 8xmGig, 16x1G, 4x10G, PoE+, Network Essentials       |
| <b>C9200L-24PXG-4X-A</b> | Catalyst 9200L 24-port 8xmGig, 16x1G, 4x10G, PoE+, Network Advantage        |
| <b>C9200L-48PXG-4X-E</b> | Catalyst 9200L 48-port 12xmGig, 36x1G, 4x10G PoE+, Network Essentials       |
| <b>C9200L-48PXG-4X-A</b> | Catalyst 9200L 48-port 12xmGig, 36x1G, 4x10G PoE+, Network Advantage        |
| <b>C9200L-24PXG-2Y-E</b> | Catalyst 9200L 24-port 8xmGig, 16x1G, 2x25G, PoE+, Network Essentials       |
| <b>C9200L-24PXG-2Y-A</b> | Catalyst 9200L 24-port 8xmGig, 16x1G, 2x25G, PoE+, Network Advantage        |
| <b>C9200L-48PXG-2Y-E</b> | Catalyst 9200L 48-port 8xmGig, 40x1G, 2x25G PoE+, Network Essentials        |
| <b>C9200L-48PXG-2Y-A</b> | Catalyst 9200L 48-port 8xmGig, 40x1G, 2x25G PoE+, Network Advantage         |

## C9200CX models

**Table 25.** C9200CX Models Ordering information

| Product number            | Product description                                                        |
|---------------------------|----------------------------------------------------------------------------|
| <b>C9200CX-12T-2X2G-E</b> | Catalyst 9200CX 12-port 1G, 2x10G and 3x1G, data, Network Essentials       |
| <b>C9200CX-12T-2X2G-A</b> | Catalyst 9200CX 12-port 1G, 2x10G and 3x1G, data, Network Advantage        |
| <b>C9200CX-12P-2X2G-E</b> | Catalyst 9200CX 12-port 1G, 2x10G and 2x1G, PoE+, Network Essentials       |
| <b>C9200CX-12P-2X2G-A</b> | Catalyst 9200CX 12-port 1G, 2x10G and 2x1G, PoE+, Network Advantage        |
| <b>C9200CX-8P-2X2G-E</b>  | Catalyst 9200CX 8-port 1G, 2x10G and 2x1G, PoE+, Network Essentials        |
| <b>C9200CX-8P-2X2G-A</b>  | Catalyst 9200CX 8-port 1G, 2x10G and 2x1G, PoE+, Network Advantage         |
| <b>C9200CX-8UXG-2X-E</b>  | Catalyst 9200CX 4-port mGig and 4-port 1G, 2x10G, UPOE, Network Essentials |
| <b>C9200CX-8UXG-2X-A</b>  | Catalyst 9200CX 4-port mGig and 4-port 1G, 2x10G, UPOE, Network Advantage  |
| <b>C9200CX-12P-2XGH-E</b> | Catalyst 9200CX 12-port 1G, 2x10G and 2x1G, PoE+, HVDC, Network Essentials |
| <b>C9200CX-12P-2XGH-A</b> | Catalyst 9200CX 12-port 1G, 2x10G and 2x1G, PoE+, HVDC, Network Advantage  |
| <b>C9200CX-8P-2XGH-E</b>  | Catalyst 9200CX 8-port 1G, 2x10G and 2x1G, PoE+, HVDC, Network Essentials  |

| <b>C9K-WALL-TRAY</b>      | Wall mount bracket for compact switches              |
| <b>C9K-CMPCT-DESK-MNT</b> | Under desk mount for compact switches                |
| <b>C9K-ACC-RBFT</b>       | Rubber Feet For Table Top Setup 9200 and 9300        |
| <b>C9K-ACC-SCR-4</b>      | 12-24 and 10-32 Screws For Rack Installation, Qty 4  |
| <b>CAB-GUIDE-1RU</b>      | 1RU Cable Management Guides 9200 and 9300            |

## Warranty

### Cisco enhanced limited lifetime hardware warranty

Cisco Catalyst 9200 Series switches come with a Cisco Enhanced Limited Lifetime Warranty (E-LLW) that includes Next-Business-Day (NBD) delivery of replacement hardware where available and 90 days of 8x5 Cisco Technical Assistance Center (TAC) support.

Your formal warranty statement, including the warranty applicable to Cisco software, appears in the information packet that accompanies your Cisco product. We encourage you to review the warranty statement shipped with your specific product carefully before use.

Cisco reserves the right to refund the purchase price as its exclusive warranty remedy.

For further information about warranty terms, visit <https://www.cisco.com/go/warranty>.

Table 33 provides information about the E-LLW.

**Table 33.** Warranty information

|                             | Cisco E-LLW                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Devices covered</b>      | Applies to Cisco Catalyst 9200 Series switches.                                                                                                                                                                                                                                                                                                                                              |
| <b>Warranty duration</b>    | As long as the original customer owns the product.                                                                                                                                                                                                                                                                                                                                           |
| <b>End-of-life policy</b>   | In the event of discontinuance of product manufacture, Cisco warranty support is limited to 5 years from the announcement of discontinuance.                                                                                                                                                                                                                                                 |
| <b>Hardware replacement</b> | Cisco or its service center will use commercially reasonable efforts to ship a replacement for NBD delivery, where available. Otherwise, a replacement will be shipped within 10 working days after receipt of the Return Materials Authorization (RMA) request. Actual delivery times might vary depending on customer location.                                                            |
| <b>Effective date</b>       | Hardware warranty commences from the date of shipment to customer (and in case of resale by a Cisco reseller, not more than 90 days after original shipment by Cisco).                                                                                                                                                                                                                       |
| <b>TAC support</b>          | Cisco will provide during business hours, 8 hours per day, 5 days per week, basic configuration, diagnosis, and troubleshooting of device-level problems for up to a 90-day period from the date of shipment of the originally purchased Cisco Catalyst 9200 Series product. This support does not include solution or network-level support beyond the specific device under consideration. |
| <b>Cisco.com access</b>     | Warranty allows guest access only to Cisco.com.                                                                                                                                                                                                                                                                                                                                              |

## Cisco services for next-generation Cisco Catalyst switches

Achieve infrastructure excellence faster and with less risk. Cisco Catalyst 9000 Switch Services provide expert guidance to help you successfully deploy, manage and support the Cisco Catalyst 9000 switches. With unmatched networking expertise, best practices and innovative tools, we can help you reduce overall upgrade, refresh, and migration costs as you introduce new hardware, software and protocols into the network. Offering a comprehensive lifecycle of services – from implementation, optimization, technical and managed services – Cisco experts help you minimize disruption and achieve operational excellence to extract maximum value from your Cisco Networking cloud ready infrastructure.

[Learn more about Cisco Services for Enterprise Networks.](#)

## Optics online reference

Cisco Catalyst 9200 Series switches support a wide range of optics. Because the list of supported optics is updated on a regular basis, consult the tables available here for the latest SFP+ and SFP compatibility information: <https://tmgmatrix.cisco.com>

## Product sustainability

Refer to the [CSR/Social Responsibility section](#) for more information on Cisco's environmental sustainability policies and initiatives.

### ENERGY STAR Certification

Cisco is driving long term value and market advantage by continuing to embed energy efficiency through hardware, software and by providing customers visibility into their energy consumption to help them baseline, identify trends and anomalies and take corrective actions.

With the ENERGY STAR certification of Catalyst 9200 Series models, Cisco is one of the first networking company to have third party-approved Campus Switches. Ecolabel certifications like ENERGY STAR help customers identify “environmentally preferable” products to help maximize energy efficiency, reduce GHG emissions and lower energy costs.

ENERGY STAR certification reinforces Cisco's ongoing commitment to deliver energy efficient products including top-rated power supplies, active power management and monitoring capabilities, alignment to ISO 14000 Environmental Management systems standards, and all designed with circularity principles in mind.

## Cisco Services

### Accelerate your journey to intent-based networking

With Cisco Services, you can achieve infrastructure excellence faster with less risk. Our services for Cisco Catalyst 9200 Series switches provide expert guidance to help you successfully plan, deploy, manage, and support your new switches. With unmatched networking expertise, best practices, and innovative tools, Cisco Services can help you reduce overall upgrade, refresh, and migration costs as you introduce new hardware, software, and protocols into the network. With a comprehensive lifecycle of services, Cisco experts will help you minimize disruption and improve operational efficiency to extract maximum value from your Cisco Networking infrastructure. [Learn more](#).

## CSR/Social Responsibility

Information about Cisco's Environmental, Social and Governance (ESG) policies and initiatives can be found in Cisco's [Corporate Social Responsibility](#) (CSR) Report.

## Cisco Capital

### Flexible payment solutions to help you achieve your objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. [Learn more](#).
