HEAVY DUTY EXTENSION PARTS WITH SMALL TEETH

- Create your own unique solution by combining various heavy duty Pedestal Mount parts
- The joints are super strong thanks to the small interlocking teeth, can be angled in 0-180° (16 positions in steps of 11,25°)
- Rod diameter 30 mm, solid rod
- Made of aluminum
- NOTE: Each part is marked 1 or 2. In order to make a straight design (angle 0°), you need to match a "part 1" with a "part 2". If you mount "part 1" onto "part 1", or "part 2" onto "part 2", it will not be possible to create a straight (angle 0°) design, but the parts will still be compatible. (Only applies for the heavy duty Pedestal Mounts with small interlocking teeth.)
