

## Easily Print PDF's to Zebra Link-OS Printers

Print PDF documents directly to Zebra Link-OS™ printers from ERP systems, such as Oracle and SAP without middleware. Until now, printers have not been able to directly print PDF's. Zebra has changed the game by creating PDF Direct – an on-printer app that allows Link-OS™ printers to directly receive and print PDFs - without middleware.

This new approach enables you to standardize the use of PDF's enterprise-wide. In addition, PDF Direct eliminates the complexity and extra steps associated with printer drivers and middleware platforms. This new approach has additional benefits:

- By using PDF's created by the ERP system, those documents can be archived for later retrieval and reprinting.
- PDF's can be created at the intended print size – eliminating the need to scale documents, which can induce bar code scanning issues.

### BENEFITS

- Eliminate middleware dependency
- No complex files to install
- No need to learn specific printer languages
- Eliminates need to scale documents
- Printed documents are archived
- Fast throughput
