Strong and firm installation

Brodit Pedestal Mounts is a mounting system for heavier devices which require a stable and strong installation. The Pedestal Mounts provide an extra sturdy and secure mounting platform which can be used in a variety of vehicles. In addition to vehicles and commercial equipment the Pedestal Mounts can also be used on virtually any flat surface. On the Pedestal Mounts you can attach any Brodit holder, giving vast possibilities of product categories to be mounted.

There are two main types of Pedestal Mounts; fixed and adjustable. The fixed Pedestal Mounts comes with or without a swiveling top. The fixed Pedestal Mounts are perfect for use on store counters, display stands or perhaps in a boat. The adjustable Pedestal Mounts provides a bit more flexibility in how you want your mounting solution to look, and is easily fitted into a fork lift, truck, tractor or any similar vehicle.

It is easy to compile a unique solution for your own requirements. The adjustable Pedestal Mounts consist of different parts that are screwed together. The teeth within the interlocking joints provide a very strong hold; once screwed together the products can withstand a lot of weight. For both the adjustable and the fixed Pedestal Mounts you can choose between already made sets or individual pieces to mix and match the parts to create the exact solution needed.

The pedestal mounts are made of aluminum, a material which promises extremely strong and durable products of low weight. Brodit can develop new solutions for specific needs upon request.

- Very strong construction
- Supports heavy devices
- Provides a firm installation
- Create your own solution
- Easily disassembled
- Made of aluminum
- Made in Sweden
- Color: black and white
