

527977 Active holder for fixed installation With tilt swivel. Apple approved charging cable.

Use an active holder for your iPad while driving and you will always have a freshly charged battery! The active holder is to be connected inside the dashboard. It provides a discreet and neat installation without any cables hanging over the interior. Safe and convenient!

12-24 Volt. The product is E-approved. Connect the power cable with a 2 A fuse. 2 A charger. Professional installation recommended.

The holder is mounted onto a tilt swivel. This means that you can adjust the angle in order to avoid light reflection on the screen. You can easily switch between portrait and landscape mode by turning the holder into desired position. It is easy to put the iPad into place in the holder, and to take it with you when leaving the car.

Tablets (Surfpads) should not be installed onto a car's dashboard if they block the view or block key controls. ProClip (Brodit's vehicle mounting bracket) is designed for installation of smaller devices like mobile phones and GPS devices, ProClip is not designed for large devices like tablets. In some vehicles the ProClip has an extra firm fit and can then be used also for installation of a tablet. If you want to place a tablet onto the car's dashboard, each combination of tablet-car must be examined in detail by you in order to determine if such an installation is possible in the specific case. Consideration should be given to the position and how firmly the ProClip is in place, as well as the size of the tablet you wish to use. Brodit will not give any recommendations for such installations.

An installation of a tablet onto a vehicle's dashboard is always done on the customer's own responsibility. Brodit recommends to use tablets on the car's headrest, installed onto a Brodit headrest mount.

This product supports Qualcomm QC 2.0 quick charge (provided the device supports Qualcomm QC 2.0 quick charge).

EAN: 7320285279773

Item no 527977 fits:

INSTALLATION INSTRUCTIONS

1.

2.

3.

4.

Important Note: Connect to a 2 A fuse holder and fuse inline with the Red wire close to the power source. Route the cable from the holder into the vehicle dashboard and secure the charger unit in place with the adhesive tape provided. Ensure the charger unit is securely mounted behind the dashboard in a well ventilated area that does not get hot! Connect as follows: 1. Connect the White wire to a Negative Ground connection of the vehicle or the vehicle chassis. 2. Connect the Red wire to a 12/24 Volt power supply in the vehicle that is controlled by the ignition switch of the vehicle. Installation of the holder: Please read all of the instructions and look at the pictures before attaching the holder. 1. Loosen the screw in the center of the holder so you can remove the tilt swivel attaching plate on the back. 2. Place the attaching plate onto the desired position. Screw the attaching plate into place with the enclosed screws. Place the holder over the attaching plate so the screw fits in the hole in the tilt swivel. Tighten the screw until the holder is firmly in place, but still can be adjusted. Slide the device sideways into the holder until you hear / feel it snaps into place. 3. To place the device in the holder: Slide it straight sideways into the holder so it connects to the connector. To remove the device from the holder: Slide it straight sideways out from the holder. 4. The holder is in place.
